

HOME COMPOSTABLE BIO-PLASTICS

Certified HOME Compostable Bagasse will Compost within 90 days and turn into a **nutrient-rich** fertilizer comprised of nitrogen, potassium, phosphorus, and calcium strengthening plant roots and overall growth. Bagasse is an eco-friendly option to paper. Bagasse looks and feels like cardboard, but sugar cane bagasse only takes 1 year to grow and harvest where paper can take up to 20 years to grow.

Plates, Cups, Bowls, Food Containers,
Clamshell Containers, Sushi Trays

Lunch Trays
