# OVERVIEW

---

- Hemp extract is infused into Nature Strips using proprietary technology. It delivers the therapeutic benefits of hemp isolate more quickly and efficiently than any product on the market. Made in USA.
- Dissolve stress, anxiety, pain, fatigue, insomnia and soothe yourself with our variety of flavors and formulas.
- Soothe and comfort your pet while enhancing overall health and well-being with Buddy Strips.
- Dissolvable, plant-based, gelatinous strips infused with hemp isolate. Nature Strips are to be dissolved under the tongue. This method of ingestion allows you to experience and enjoy the therapeutic benefits of hemp extract quickly and easily.
- Uses Hemp isolate from an American, organic, hemp farm that produces the only non-detect levels of THC in every batch, it is 99% pure, potent, and free of contaminants. This high quality hemp extract is infused directly into Nature Strips products. Other products spray hemp extract on the outside of the product. Our method provides consistent, uniform dosing and a more effective, reliable experience.
- Versions with THC also available.

# FEATURES AND BENEFITS - CBD STRIPS

---

- Anything can be printed on the strips (logos, dosage information, etc.) The ink is vegetable-based and edible. Other companies have attempted this, but the inks cause the product to mold rapidly.
- Great for private label customers.
- The strip allows for equal distribution of the product (CBD or THC), so if there is a 20 mg strip cut into four equal pieces, each piece will have the same amount of product. CBD or THC do not bind well with flour or sugar, so a 20 mg brownie cut into four pieces might have one piece with 20 mg in it and another piece with nothing at all.
- Nature Strips are not gel based, but vegetable-based and only use natural flavours. The strips don't require individual packaging as they don't stick together.
- This technology can also be used as a delivery mechanism for vitamins. Make the product fun for the children's market, for example.

# SLEEP FORMULA
